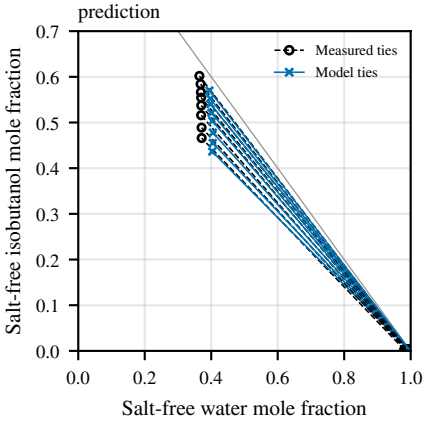
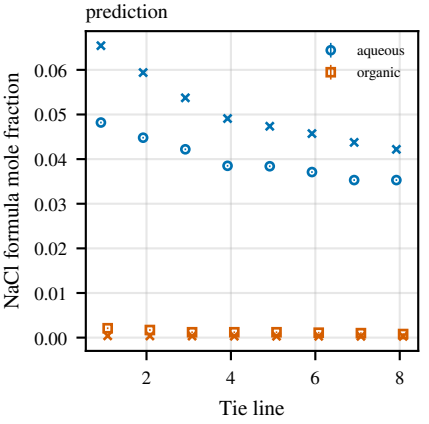
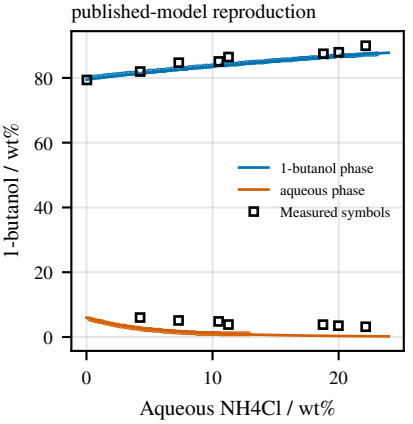
(a) Khudaida / salt-free projection
prediction



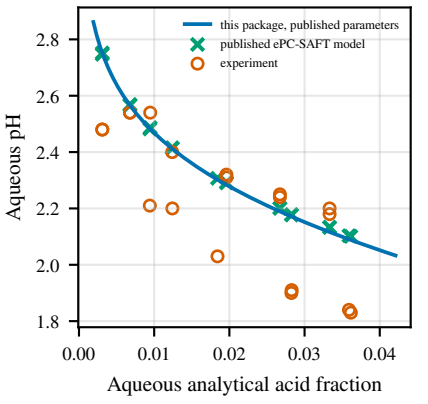
(b) Khudaida / NaCl formula
fraction
prediction



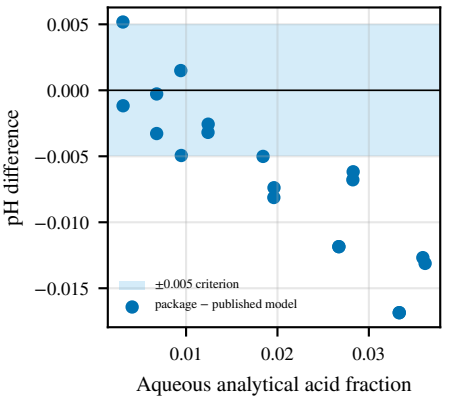
(c) 1-butanol/NH4Cl/water
published-model reproduction



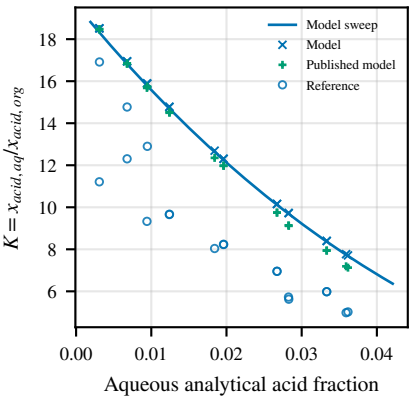
(d) Acetic acid / water-toluene
prediction



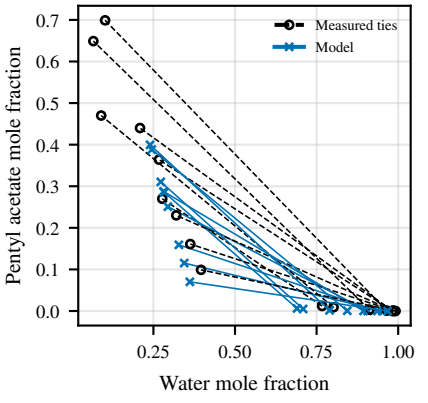
(e) Source-model disagreement
published-model reproduction



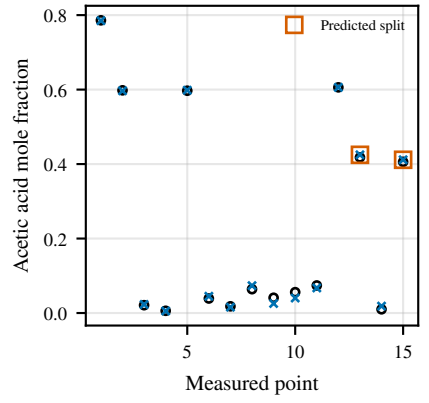
(f) Acetic acid partition
calibration



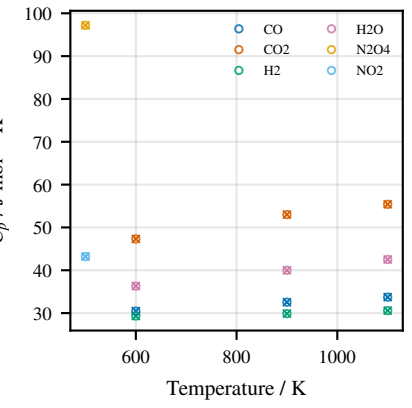
(g) Esterification tie lines
published-model reproduction



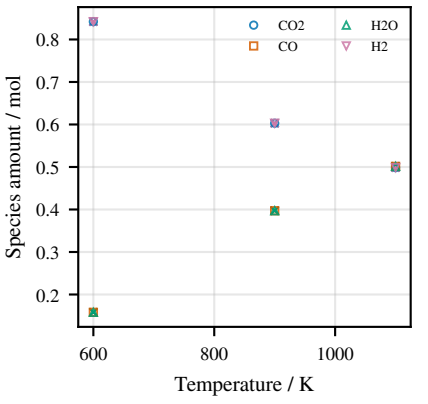
(h) Homogeneous reference states
published-model reproduction



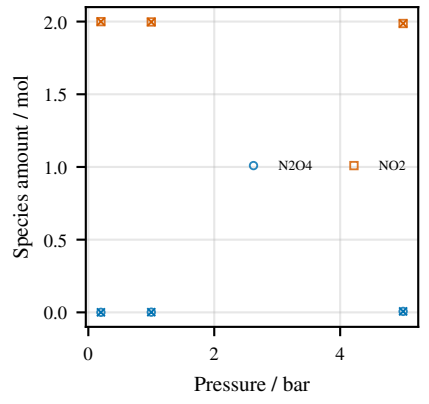
(i) Chase / printed properties
numerical verification



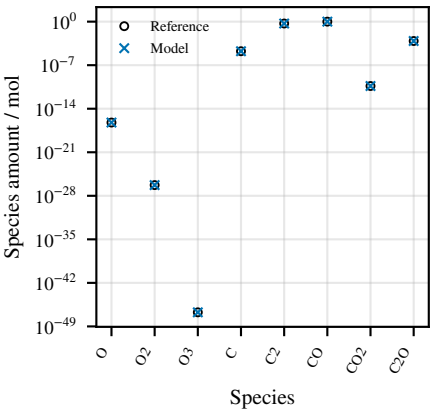
(j) Water-gas shift
numerical verification



(k) N_2O_4/NO_2
numerical verification



(l) Eight-gas restriction
numerical verification



Open symbols: measurements or references; crosses: discrete model evaluations; lines: continuous model calculations.
