Open symbols: measurements or references; crosses: discrete model evaluations; lines: continuous model calculations.

(a) Methane/n-butane

published-model reproduction / prediction

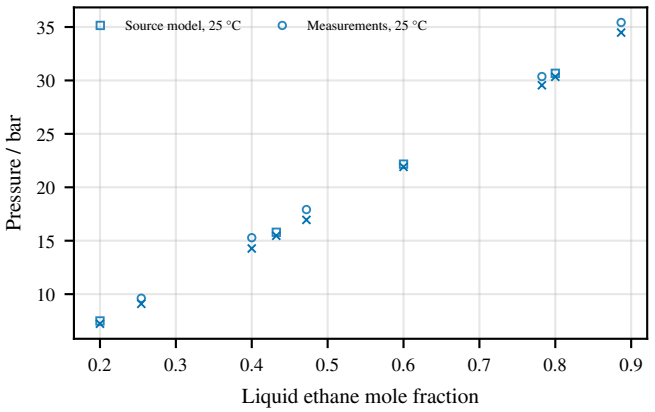

(b) Ethane/n-decane

published-model reproduction / prediction

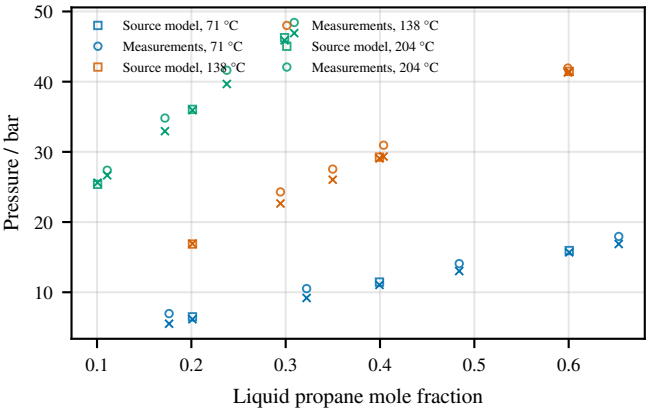

(c) Ethane/diethyl ether

published-model reproduction / prediction

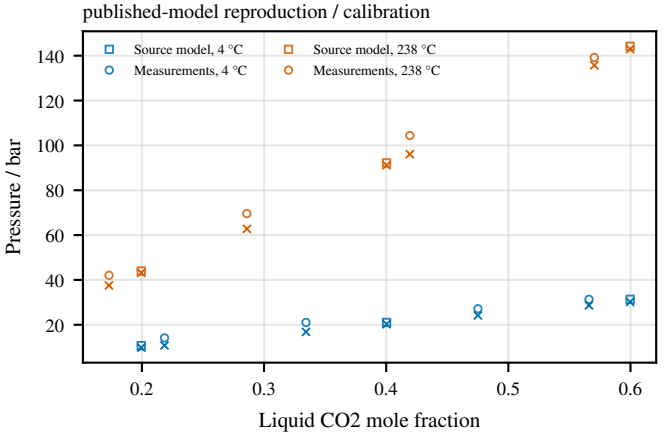

(d) Propane/benzene

published-model reproduction / prediction

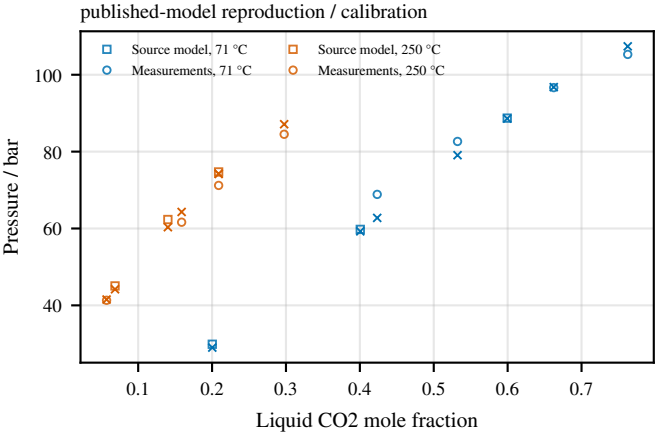

(e) CO2/n-decane

published-model reproduction / calibration

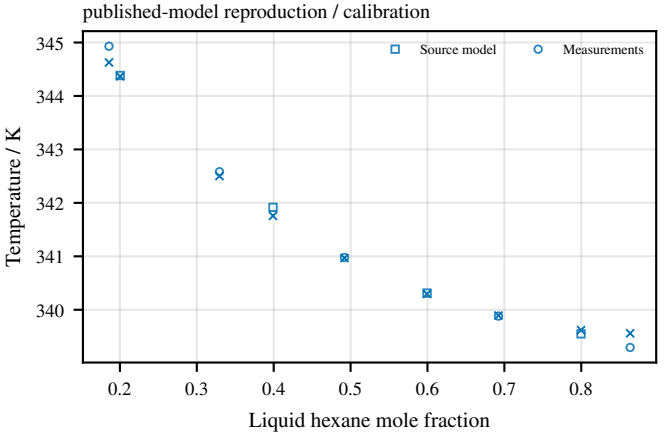

(f) CO2/cyclohexane

published-model reproduction / calibration

(g) Hexane/1-chlorobutane

published-model reproduction / calibration

Open symbols: measurements or references; crosses: discrete model evaluations; lines: continuous model calculations.
